ABOUT OUR COMPANY

Our comprehensive knowledge of Information Management Systems allows us to provide our clients with a high-quality, cost-effective solution to their needs

Our Mission

Our objective is to deliver a targeted, independently managed program to our Business Partners that will enhance and complement their business goals while also providing simple access to an industry-leading variety of products and services in the IT sector.

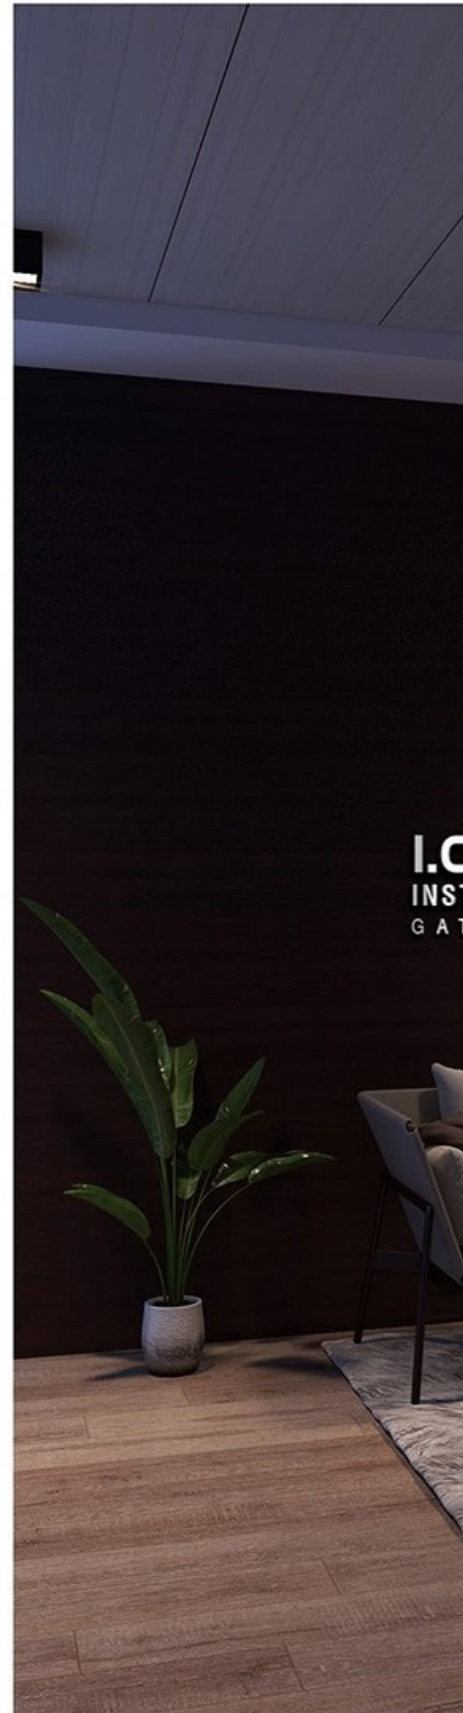

The mission of IONS Solutions is to promote technical innovation and excellence for the greater good.

Our VISION

IONS Solutions aspires to be a leader in IT Infrastructure, Consultation, Integration, and Support in Pakistan and UAE, guided by the idea of striving for perfection. Today, with a desire to expand and a mindset to compete worldwide in the future.

Be indispensable to the global technical community and technical professionals everywhere and be widely acknowledged for the role of technology and technical experts in improving global circumstances.

" We try to have the kind of a culture that doesn't value excuses in the sense that when you're supposed to accomplish something, and you're at a high level, then your job is to accomplish it, in spite of difficulty. And you're rewarded for dealing with that. "

Message From CEO

IONS Solutions goal is to deliver high quality services to its valuable customers with advanced IT solutions, training and reliable products. We provide a comprehensive range of highly optimized, creative, and cost-effective solutions & services.

We are struggling hard to reach higher levels of excellence and to make a meaningful contribution to the IT sector by using the most cutting-edge technologies available.

Shehroz Arif
CEO & Founder

Solution & Services Offering

There is a spiritual aspect to our lives – when we give, we receive when a business does something good for somebody, that somebody feels good about them!

Enterprise Networking Solutions

The world is moving toward IP as a means of completely automating and managing corporate operations from any location on the network. Because today's business is conducted online, networks are a vital component of IT infrastructure. They must be always available.

Network Security Solutions

The goal of enterprise network security is to protect an organization's data assets against intruders, hackers, and others with bad intent. It entails safeguarding your company's sensitive data, emails, and network infrastructure.

Wireless Networking Solutions

We understand that all businesses large and small require reliable wireless access. We offer wireless solutions that eliminate security issues and connect locations that are miles away and allow VoIP to flow wirelessly.

"We don't want to push our ideas on to customers, we simply want to make what they want."

Server & Storage Solutions

For every requirement or problem businesses and organizations seek for the most cost-effective solutions. We assist businesses in aligning technology with their strategic goals in order to achieve better business outcomes.

Physical Security Solutions

We have considerable experience in IP surveillance project planning and development. Which is the most difficult need for any sector to meet in order to mitigate the physical security risk in the environment.

Managed Services / Service Level Agreement

Through our qualified technical staff, we also providing Service Level Agreements to loyal clients for Servers, Networks, Surveillance, Data Center, Resident Engineers, Laptops, and Desktops.

IT Consultancy Solutions

For IT-enabled businesses controlling and understanding network CAPEX and OPEX is a key problem. We are always willing to provide a hand in resolving issues. Our qualified engineers and skilled consultants provide a full solution, consulting, and services to meet your demands.

BUSINESS & ACADEMIC PARTNERSHIPS

NETWORK & SECURITY

If you make a sale, you can make a living If you make an investment of time and good service in a customer, you can make a fortune.

The Cisco networks has truly become the platform for providing one seamless, transparent customer experience. As a result, Cisco and Cisco technology is changing the way we work, live, play, and learn.

Fortinet headquartered in Sunnyvale, Calif with offices around the world, is a worldwide provider of network security appliances and a market leader in unified threat management.

Sangfor Technologies is a leading global vendor of IT infrastructure solutions, specializing in Cloud Computing & Network Security with a wide range of products & services including

Founded in 1987, Huawei is a leading global provider of information and communications technology (ICT) infrastructure and smart devices. We have approximately 197,000 employees and we operate in over 170 countries and regions, serving more than three billion people around the world.

HPE is a global, edge-to-cloud Platform-as-a-Service company built to transform your business. How? By helping you connect, protect, analyze, and act on all your data and applications wherever they live, from edge to cloud, so you can turn insights into outcomes at the speed required to thrive in today's complex world.

Aruba has repeatedly been recognized by third party analysts as a leader in Wi-Fi 6, switching, SD-Branch and visionary in Data Center networking. The world's largest companies rely on Aruba to provide a secure, AI-powered edge services platform that spans across campus, branch, data center and remote working environments.
